

Main.java

```
1 class Main {
2     public static void main(String[] args) {
3         // Initialize an array
4         int[] numbers = {10, 20, 30, 40, 50};
5
6         // Define the index you want to access (remembering Java uses 0-based
7         // indexing)
8         int index = 2;
9
10        // Access and print the element
11        System.out.println("Element at index " + index + ": " + numbers[index]);
12    }
```

Output

Element at index 2: 30
